Afnan Mohannad Amarni

Computer Systems Engineer and Full Stack Engineer

*Motivated Computer Systems Engineer with over 5 years of experience in **full-stack development**, specializing in designing and optimizing secure, high-performance, and SEO-friendly web applications. I specialize in building scalable solutions across both the front end and back end, and I am currently seeking a new opportunity to grow and further refine my full-stack development skills.*

💼 WORK EXPERIENCE

Full-Stack Engineer – Full Time
NADSoft Co.

04/2021 – Present   *Jenin – Amman*

Nadsoft offers over 15 years of software development for enterprises.

Achievements/Tasks

- Worked as a Full-Stack Developer, building both **front-end** and **back-end** from scratch to **deployment**, delivering robust and scalable, high-performance, SEO-friendly web applications.
- Used HTML, CSS, and JavaScript to translate designs and requirements into **responsive, user-friendly** interfaces with a strong focus on **performance** and modern aesthetics.
- Develop scalable **back-end components** and work with **micro-services architectures** to ensure modular and maintainable solutions.
- Collaborate with **front-end developers** to ensure seamless integration of their work with the application's core functionality.
- Technology Stack: **Front-End** (HTML5, CSS3, Tailwind CSS, JavaScript, Vue.js, Alpine.js, React.js); **Back-End** (Laravel, Lumen, Symfony, NodeJS – Express.js); **Database** (MySQL, MongoDB); **Deployment** (AWS, Laravel Forge); **Tools** : (Lighthouse, Gtmetrix, Postman, Swagger)
